Summary

Java Backend Developer with **4+** years of experience in developing scalable enterprise applications using **Java 8, Spring Boot, REST APIs, Hibernate**, and **Microservices**. Skilled in **API integration, debugging, production support, unit testing**, CI/CD pipelines, and database optimization using **MySQL**. Strong understanding of **OOPs, Collections, Multithreading**, and **Agile methodologies**.

Technical Skills

Programming Languages: Java 8, J2EE, SQL, HTML, XML.

Frameworks & Technologies: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, REST APIs, SOAP Web Services.

Databases: MySQL, JDBC.

DevOps & Tools: Git, GitLab, Maven, Jenkins, CI/CD, Azure DevOps, Swagger, Postman.

Testing: JUnit, Mockito

Concepts: OOPs, Collections, Exception Handling, Multithreading, MVC, Design Patterns, SDLC, Agile Scrum

Operating Systems: Linux, Windows.

Servers & IDEs: Apache Tomcat, Eclipse, STS, IntelliJ IDEA, VS Code.

Work Experience

Tata Consultancy Services (TCS)

May 2022 - Present

System Engineer

Pune, Maharashtra

- Developed and maintained backend services using **Java 8, Spring Boot, Hibernate, and REST APIs**.
- Designed and optimized database queries using **MySQL** and **JPA** for high performance.
- Conducted **unit and integration testing** using **JUnit** and **Mockito**; validated APIs via **Postman**.
- Automated build and deployment using **Maven** and **Jenkins CI/CD pipelines**.
- Integrated **Spring Security** for role-based access control in backend services, improving application security and compliance.
- Collaborated in **Agile Scrum** teams, participating in sprint planning, code reviews, and retrospectives.
- Worked on a legacy **Java 8-based middleware application** (Sync Manager) **integrating Configurator** systems with **PDM/ENOVIA** platforms.
- Developed and integrated **SOAP Web Service client** calls using **WSDL** for enterprise transaction processing and external system integration.

Projects

1) Sync Manager

Dec 2025 - Present

Tech Stack: Java 8, SOAP Web Services, WSDL, JDBC, Middleware, Gitlab, Eclipse, Azure DevOps, MySQL, Agile/Scrum, JUnit

Description: Sync Manager is a system used to sync and manage data between multiple applications smoothly and accurately in real time.

Responsibilities:

- Worked on a legacy **Java 8-based middleware application** (Sync Manager) **integrating Configurator** systems with **PDM/ENOVIA** platforms.
- Developed and integrated **SOAP Web Service client** calls using **WSDL** for enterprise transaction processing and external system integration.
- Replaced legacy **ai.idl-based integrations** with **SOAP-based** middleware services using **Java 8**.
- Worked on **Polling Server architecture**, Flow Managers, Business Rules, Delegate layers, transaction processing, and exception handling.
- Performed code tracing, **debugging**, **root cause analysis**, enhancement implementation, and production support for enterprise middleware applications.

2)ATM-Switch

July 2022 – Nov 2025

Tech Stack: Java 8, Spring Boot, Spring MVC, Spring Security, Hibernate, MySQL, REST API, Jenkins, JUnit, Mockito, Postman, Microservices, Maven, Agile/Scrum, Git.

Description: ATM Switch developed for seamless communication between ATMs and core banking systems, enabling secure transaction routing, and processing across the banking network.

Responsibilities:

- Designed and implemented APIs enabling smooth interaction between ATM systems and banking services.
- Improved security, performance, and reliability of ATM transaction processing.
- Ensured efficient routing and processing of financial transactions across the banking network.
- Worked in Agile teams to support feature development, enhancements, and bug fixes.
- Applied Spring Boot microservices for modular, scalable service design.
- Performed unit and integration tests using JUnit and Mockito.
- Used Postman and Swagger for API development and debugging.

Certifications

Java Certification – Udemy – 2023 (Core & Advanced Java)

Microsoft Certified – Azure Administrator (AZ-104) – 2023

AWS Certified – Cloud Practitioner – 2023

Spring Boot & Microservices Development – TCS Internal Program – 2023

TCS ILP Training – TCS – 2022 (Core Java, MySQL, API Development, SDLC)

Education

GH Rasoni College of Engineering

Bachelor of Engineering, Mechanical Engineering

CGPA: 8.5

Nagpur, Maharashtra

2018-2021

Achievements

- **Client Appreciation (Sep 2025):** Received recognition from the client for timely delivery, proactive support, and high-impact contributions to project success.
- **Technical Excellence Award – TCS (Nov 2025):** Recognized for exceptional technical contributions, consistent high-quality delivery, and strong problem-solving skills on critical assignments.
- **Idea Igniter – tcsAI Hackathon (Nov 2025):** Selected for proposing an innovative AI-driven solution idea that demonstrated creativity, feasibility, and strong business value.
- **tcsAI Hackathon – TCS Spark Track (Nov 2025):** Contributed to solution design, rapid prototyping, and cross-team collaboration during the TCS Spark innovation track.
- Improved **API performance** by 20% through query optimization and caching strategies.
- Implemented secure backend modules using Spring Security for access control.
- Consistently achieved 100% **sprint** completion rate in **Agile delivery**.
- Active on **LeetCode** for continuous problem-solving practice and algorithm optimization.
